

DDK MAIN-NET (PRODUCTION) PROGRESS AND UPDATES - DONE**3rd August 2018**

- ✓ Launched VPC for DDK Production.
- ✓ Launched subnets for DDK Prod frontend, backend, db, es and redis.
- ✓ Launched NACL for Prod frontend, backend, db, es and redis.
- ✓ Launched Security groups for Prod frontend, backend, db, es and redis.

6th August 2018

- ✓ Worked on setting Blockchain code using Docker image and compose.
- ✓ Worked on configuring DDK wallet UI code using Docker image.
- ✓ Resolved issues including dependencies, missing modules like grunt-cli and missing configuration file while running the code.
- ✓ Created and tested Dockerfile for running UI code as node server for Build automation.
- ✓ Dockerfile contains following operations:
 - Installing node modules, bower, grunt as use them as cache in future if package.json does not change.
 - Running UI node server as entry point.

7th August 2018

- ✓ Configured Blockchain on Docker as a Docker image.
- ✓ Resolved issues like postgres role error, redis error etc while configuring.
- ✓ Created a Dockerfile for running Blockchain code inside Docker.

8th August 2018

- ✓ Worked on configuring DDK explorer UI as a Docker image.
